 - 12 lb. pet = 2 mini patties per day
 - 25 lb. pet = 4 mini patties per day
- *1 mini patty = 2 ounces (1/4 cup)
of real raw meat diet.

Freeze-Dried Nibblets

**A Superb Training Reward &
‘No Guilt’ Treat**

If used as Pet Food, Feed:

- 6 lb. pet = 2 to 3 oz. per day
- 12 lb. pet – 3/4 cup per day
- 25 lb. pet -- 1½ cups per day
- 50 lb. pet -- 3 cups per day
- 100 lb. pet -- 6 cups per day

Freeze-Dried Sprinkles Feeding Guide (Great for puppies & Dogs/Cats with loose or missing teeth):

- 6 lb. pet = 1/3 cup (loose, not packed)
(equals 0.6 oz in weight)
- 12 lb. pet = 3/4 cup (loose, not packed)
(equals 1.4 oz in weight)
- 25 lb. pet = 1½ cup (loose, not packed) (equals
2.8 oz in weight)

Important: The above product feeding guides are based on feeding 2%* of body weight (which equals ½ Lb., 8 oz., or 1 cup of original fresh frozen food weight for every 25 Lbs of actual body weight; for small dogs, just 2 oz. for every 6 Lbs of actual body weight). When opting to feed freeze-dried products, the above chart remains the same as only the moisture is removed in the freeze-drying process, leaving all the original nutrients. Freeze-dried products can be served dry, or rehydrated with lukewarm (NOT hot) water.

*Growing puppies/kittens and pregnant or nursing dogs/cats may require as much as 3%-4% of body weight fed per day during early growth and high bio-performance requirement periods.

*If feeding a 50/50 diet (using AFS as a nutrition strengthener to some other product), please remember to reduce the volume of the other product by 50%.

Less Volume – More Satisfying Nutrition!
