### Want to REMOVE Litter Box Odor from the house?

By feeding AFS Real Meat Diets, increased digestion occurs, which can ELIMINATE that litter box odor day after day. (Because AFS products are all about natural nutrition and increased digestibility; without substitutes.)

Many other pet foods contain artificial ingredients, which can increase toxicity within the digestive track, as well as other parts of the body. This ill effect, along with partially digested unnatural ingredients, is the primary cause of smelly waste.

### The Feeding Cat Challenge:

Cats can be **Taste, Texture, Temperature and/or Smell** sensitive! Therefore, changing a cat's food can be quick and easy, or a bit of a challenge. We suggest that you first introduce the AFS product that best suits your budget and/or life style, by gradually adding a bit more to each feeding of it's current pet food over the course of 7-10 days. If your cat reacts positively, great! If your cat reacts negatively, one of the below transition methods should work:

- Serve the AFS product close to the same temperature, as it's previous food; cool it down or warm it up to room temperature (don't bake or cook it).
- For the smell sensitive cat, place a small amount of food inside the cat's mouth so it gets an actual taste.
- Try feeding the AFS product after your cat has not eaten for 1-2 days (your cat may then be hungry enough to get past any indifferences).
- Try a different AFS product version (freeze-dried, rehydrated freeze-dried, or fresh-frozen).

If your cat is one of the more challenging ones, please do not give up—the wonderful health rewards of natural sourced nutrition are far too great! Remember, human beings, too, have found it difficult to make the transition between salt and sugar riddled foods to more natural and wholesome ones. But, those who have succeeded report the improvement of overall health, vitality and longevity!

#### Recommended Daily Feedings For Cats Carnivore Diet (Felines)

**Based on raw diet standard, feeding 2% of body weight:**

##### AFS Large, ½ lb. Patties

6 lb. cat .....	¼ Pet Patty (1/8 lb.) per day
12 lb. cat .....	½ Pet Patty (¼ lb.) per day
25 lb. cat .....	1 Pet Patty (½ lb.) per day

##### AFS Mini Patties

6 lb. cat .....	1 Mini Patty (1/8 lb.) per day
12 lb. cat .....	2 Mini Patties (¼ lb.) per day
25 lb. cat .....	4 Mini Patties (½ lb.) per day

\*Growing kittens and pregnant or nursing cats may require as much as 3%-4% of body weight per day during early growth and high performance months.
